EXPERIENCE

Industrial design Intern / May 2019 - July 2019
Four Eyes Research, Pune

Research, design and developed a new sustainable material out of sugarcane skin and tested its properties based on various international standards.

Designed furniture and other products to showcase the beneficial properties of the new material developed reducing cost and achieving greater strength over traditional osb's and mdf's.

Managed day to day tasks and assignments of this project and collaborated with third parties as and when required to get things done.

Design Lead / February 2018 - Present
Barcode Entertainment

Created 3D design and experiences of spaces and their mock-ups showing various marketing activations which then executed pan India in a short span of time.

Designed graphics, prints and 2D creatives for different clients based on their needs and requirements in a given time frame.

Designed the in-house collaterals to position it as a top tier btl marketing agency in India and abroad.

Freelance Designer / 2015 - Present
Self-employed

Designed a wide variety of things for different individuals and businesses helping them grow through the power of design while gaining meaningful insights from different industries and keeping a problem solving approach throughout the process.
